Flexible on this I suppose
100 years
But we intend to pay all up front.
See comment above - depends on the amount of the assessment!
We could pay over time with small amount up front.
Less than 10%

<p>We are not able to afford the costs of the proposed road improvement costs, nor do we wish to proceed with them. We are trying to save to build a house on our property and this would not allow us to do so</p>
<p>unlikely to want to pay over time, prefer up front as minimizes overall financing cost. suggest as short as possible if financing is required</p>
<p>CANNOT afford to any length of time TO PAY. I vote to maintain the present road system and enjoy life .</p>
<p>Allowing some folks more time to pay will make it easier for them to afford it, and It may turn there opposition to a supportive vote for future projects</p>
<p>Not paying. Maintain the roads. No cost to me.</p>

I think you should provide the interest rate if financed, because if the interest rate was like 6%. I would rather pay it up front. If the interest rate was like 2%, I would probably opt to finance it.
I am impressed with the response that the Committee received about this. Also, I am grateful to the Committee for all the work you have done on behalf of the community.
other property on line
not sure either part or all use 10 yearas
does not apply
